Summary

Efficient logistics professional with 5 years' working experience in marketing, international trading and logistics. A motivated and committed computing and innovation graduate from the University of Adelaide with software development experience in several ERP and logistic system development projects.

Career Objective

To source a position ideally combining IT and business in an established global organisation. Seeking to leverage and grow my technical and professional expertise in ERP systems.

Employment History

Apr 2018 - July 2018

IT Intern

Kerry Logistics (Australia) Pty Ltd
Adelaide, Australia

Developing the HighJump Warehouse System as a team member in Agile methodology

- Organised 300 user accounts from the SQL database and generated the active user list.
- Finished 150 pages System Specification document.
- Reviewed 48 user interface flow charts of the RF Gun Machines.
- Designed the system flow charts, user interfaces and the master data required for the warehouse dock booking system.

Jun 2014 - Apr 2015

Logistics Coordinator

Runsven (Shanghai) Co., Ltd
Shanghai, China

Subsidiary of the Swedish company Runsven AB. Ensured smooth operations with maximum efficiency of a variety of channels among suppliers, forwarders, warehouse and buyers.

- Improved the lead time and delivery accurate rate by 20%.
- Arranged shipment inspection schedules with vendors weekly.
- Consolidated container forecasts on a weekly basis, secured vessel space availability and provided weekly status updates to the Swedish headquarters.
- Purchased textile and pet products. Arranged and participated in a 3-week business trip. Visited the Canton Fair and factories in Guangzhou, Hangzhou and Shanghai.

Sep 2010 - Apr 2014

Purchasing & Logistics Executive
Augment Marketing Pte. Ltd.
Singapore

Responsible for sourcing, negotiating and purchasing fast moving consumer goods from both local and overseas vendors, and using the IT system to manage stock levels and delivery times.

- Coordinated with Marketing and Logistics departments, analysed sales and inventory data, and then forecasted the demand and set purchases for the next period.
- Placed orders, tracked shipments, and monitored receipts and arranged daily payments.
- Analysed the suppliers' monthly KPIs.
- Monitored the logistics cost and productivity for transportation, inventory and operations. Improved on-time rate by 30% and decreased the inventory shortage cost by 24%.
- Developed an ERP system with the SAP project team.

Education

Master of Computing and Innovation

The University of Adelaide
