Dear Alogic Recruitment team

Re: Industrial Designer

I am writing to apply for the position of Industrial Designer which was advertised online at LinkedIn. My strengths and qualifications are an ideal match to the Industrial Designer requirements and will bring immediate value to the company since I pride myself as a very professional committed to his job, reliable and productive.

To illustrate the scope of my career history and professional competencies, please take a moment to review my enclosed Resume which shows that I would bring important skills to the position, including:

- I have over 5 years of related work experience in products and mechanical design as well as development of engineering projects involving complex mechanical structures and systems.
- I have a wide understanding of manufacturing processes and materials including, steels, sheet metal, polymers, ply boards among others.
- I am very competent in 3D modelling, 2D Sketching as well as in the elaboration of technical drawings for production and assembly with proficiency in SOLIDWORKS, Inventor and AutoCAD.
- Through my career I have contributed to positive business results, through effective organisation, prioritisation and methodical approach to problem solving.

Further, my innovation, critical thinking and teamwork abilities will serve to support the continued organizational efforts. While I am independently motivated, I appreciate collective efforts and collaborate productively within group settings.

Thank you for considering my application. I look forward to hearing from you.

Yours sincerely,
Tomas Gaviria Cano
