Ref: Position of Product Manager @ ALOGIC

Hi

After reviewing the requirements for the role of Product Manager, I recognize that this is an exciting and challenging prospect. This role requires a seasoned product leader who has successfully launched stellar products to market, managed growth and proven ability to deliver solutions to complex problems. I believe that I possess the necessary talent, skill set and experience to be a great fit for this role.

I operate as the CEO of my product with hands-on approach to product delivery and ensuring key business goals are achieved. I'm fortunate to have gained valuable work experience (in U.S. & India) with esteemed organizations in Technology & Consulting. I've excelled in all my roles by demonstrating leadership skills, accountability & the resourcefulness to get things done! I've been recognized for my strong communication skills and attention to detail.

I can clearly see that this is one of Alogic's key roles and is essential to the success of the business. Customer focus is central in the world of hardware and would truly enjoy working for a leader in consumer electronics and mobility products.

As I've received my PR, I'm available in the timeframe of Jan end / Feb 1st week 2019. I would love to meet with you to discuss this opportunity. Please let me know on next steps.

Thank you!

Regards

Vinay Narayanan
