- 6. Safety.....P.08

Product Specification

Part No: SB-10APT

Appearance

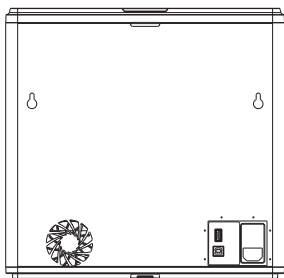

Unique and durable plastic design. Environmental friendly.

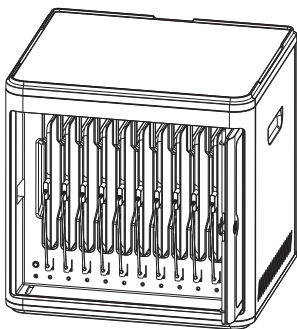

Product Spec

Model Name	SB-10APT	Container Load (20' / 40')	15.5kgs/ 18kgs
Capacity	10 Tablet	LED Indicator	10
Max. tablet size	iPad 2 / The New iPad, iPad Air, iPad Air 2	Power Rating	Input: AC 100-120 V / 200-240V, 50/60Hz, 3A / 2A Output: USB 1 port DC 5V, 2.4A
Dim. with Packing	510 x 470 x 555mm		
N.W / G.W.	10kgs / 12kgs	Fan	DC12V / 0.11A

Charging Set-Up

1. Make sure Power switch on the back of the product is in "OFF" position. Connect the power cable to the product, then switch the power switch to "ON".

2. Place the tablet into the slot. Connect the USB connector cables to the tablet.
3. Insert the USB cable into the USB port by sequence.
4. When the power switch is ON, charging will proceed.

Note: the device will not charge and sync at the same time.

LED indicator:

Colour Green = Charged

Colour Amber = Charging in progress

Colour Red = Sync in progress

Colour Red Flashing = Over current protection

Note:

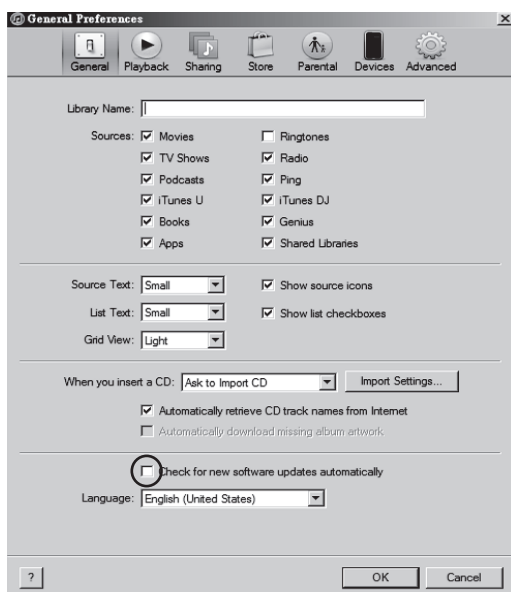

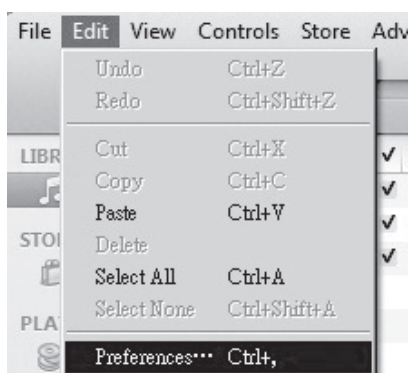

1. LED indicators may have abnormal display if the connector cable is damaged or incorrect specification.
2. Remove the Device and turn off the AC power for over current reset.

Synchronising Set-Up

iTunes Set-Up

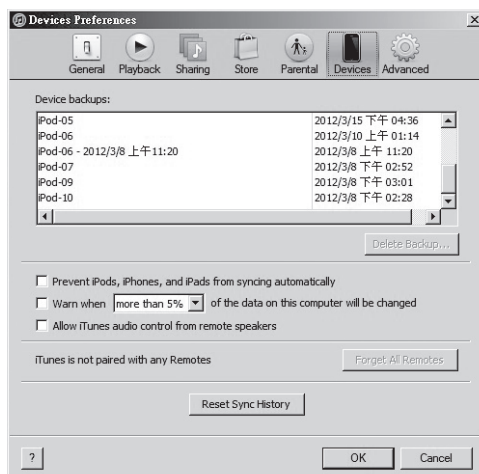

Here are a few settings that should be changed in iTunes to make it work best with your Smartbox and iPads.

1. Open the iTunes application on your master laptop. Select preferences from the Edit menu. On the general panel, uncheck "Check for new software updates automatically". This keeps the automatic update process from interfering with the syncing process. You can still check for iOS updates by manually clicking on the Check for Updates button on the individual iPad screens. For more on iOS updates, see the iOS Update section below.

2. Next, click on the Device icon. Make sure none of the options are selected. The screen should look like this when complete. Click OK to save your changes.

3. Prepare your iTunes library by downloading the Apps, Books, Music Etc that you intend to copy to your iPads.

iPad Set-Up

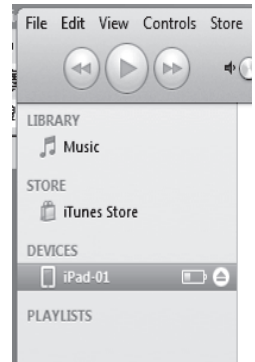

Before starting the syncing process, each individual iPad needs to be configured to work with iTunes and the Smartbox correctly. This can be done by plugging each device into the master syncing laptop one unit at a time, or you can plug one unit in at a time within Smartbox slot. To speed up the syncing process when syncing multiple devices, Apple Terminal or third party software.

1. Set- Up your master Laptop. Plug the power cord into the auxiliary outlet and the USB cable into the Auxiliary USB Plug. Plug the Smartbox power cord into a wall outlet.
2. Select one iPad. We recommend setting your screen brightness at half level or less as the screen does stay on during syncing process. Go to settings and select Brightness. Click Auto- Brightness so it turns to Off. Slide the Brightness slide to left so it is positioned halfway between dim and bright.

3. Plug iPad connector into the USB slot.

Note: if connected to a PC, during this time drivers will be loading, so wait until you get the message that your device is ready to use before proceeding to step 4

4. Open iTunes if it does not open automatically, Select your iPad device from the Device table on the left side of the screen.
5. The iPad registration screen will come up. Follow the prompts to log in or create an Apple ID and name your iPad.
6. Click on the summary tab. Select "Open iTunes when this iPad is connected" and "Sync only checked songs and videos". Verify "Manually manage music and videos" is not selected (this function would require you to drag and drop your selections in each iPad).
7. Click on each of the tabs at the top (Apps, Music, Movies, TV Shows, Books, Photos) and select which type of files you will want to sync on this device. Click the Sync or Apply button.
8. Repeat Step 2-7 with each iPad that will be used in this product.

iOS Updates

1. When all the iPad devices have been configured, you are ready to charge and sync your tablets. Place each iPad in a slot in the Smartbox. Plug each device in using the 30-pin Apple connectors. Plug the Smartbox into a wall outlet.

2. If the iPad devices are new, they should be fully charged before attempting to sync.

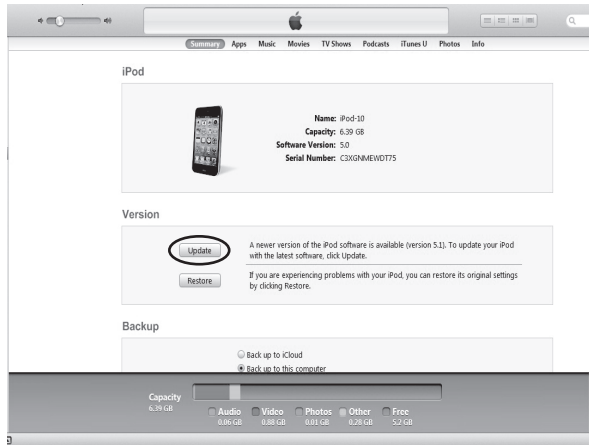

3. When ready to sync, connect one end of the USB cable into the USB port near the auxiliary outlet and the other into a USB 2.0 port on your Mac or PC

4. iTunes will open and syncing will start automatically. Each iPad will be listed in iTunes under the device list on the left hand side of the screen. You could review the sync status from master PC.

NOTE: Please keep in mind that identifying the devices and syncing will take time, so please be patient. The time is dependent on the number of iPads being synced and the amount of data being transferred. It can range from a few minutes to hours on 10 devices depending on different content. Please do not stop the process once it has been started.

5. When syncing is complete, the Eject symbol will appear next to each device. At this time it is safe to eject the device by clicking on the eject symbol or closing iTunes.

6. When syncing is complete, unplug the USB cable from your PC so charging can begin. Charging will not occur while the USB cable is plugged into the master laptop.

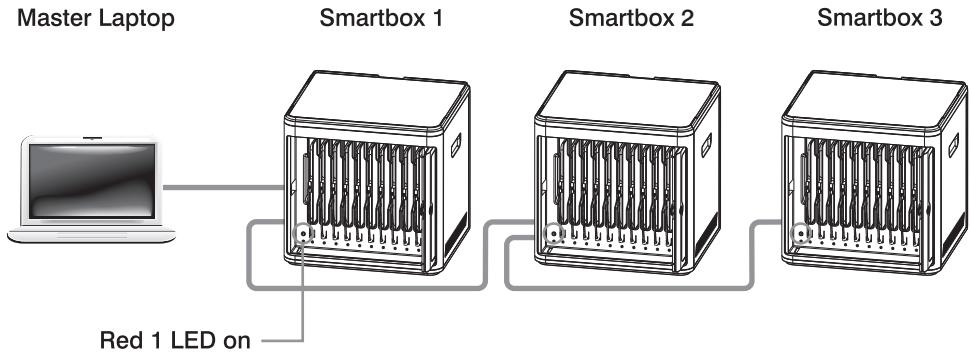

Ready to Sync

Due to the functionality of the iTunes software, iOS updates can not be done across the whole fleet of iPads at one time. This will need to be completed one unit at a time. It can still be done with the units plugged into the Smartbox. To update iOS on each iPad, select an iPad from under the device list on the left side of the screen. Click on the Update button in the middle of the screen. Follow the prompts to complete the update. Updating time will vary depending on the size of the update from Apple. When one unit is complete, the next unit can be selected until all units have been updated.

Daisy Chain Connection

Daisy chain is a wiring scheme in which multiple devices are wired together in sequence for up to 30 Tablet devices.

Setting up your Daisy Chain

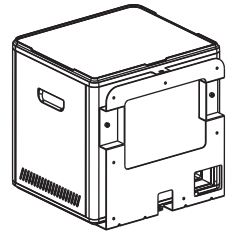

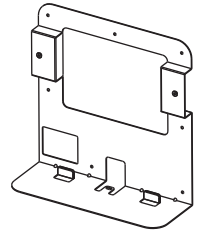

1. Arrange the unit in order on secure surface.
2. Place Tablet devices in the slot, connecting the USB cable to the device and USB port. Push Sync switch button on "ON", LED light will appear in red.
3. Connect all units together by USB cable. Connect your master laptop or Mac to the USB port located on the back side of the unit. iTunes will automatically detect the new searched device name.
4. Adding new Tablet device for sync will require resetting the Sync switch button.

Attaching Bracket Buckle & Wall-Mounting

Bracket buckle is attached on the rear top and bottom of the product, the bracket buckle can be attached on the surface using table mount kit.

Attaching the wall-mount bracket:

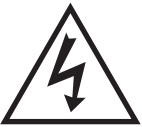

preparation: Screw (T.,Half round,Stainless, T4*L30mm)
Anchor nut (1/4" *L27mm,EM35114-70,PVC).
Wall-Mounting kit only applies on wood structure wall and concrete wall. Make sure there is enough space on the wall with the product door open. Drill the hole and drive the anchor nuts into the wall. Place the holding plate on the wall, and then tighten with M5 stainless screws. Position the product over the wall bracket and then slide it downward to set it in place.

Safety

WARNING :

This product must only be used for its intended purpose in accordance with these operating instructions. Failure to observe the following notices can result in fire, injury, death by electric shock or equipment damage

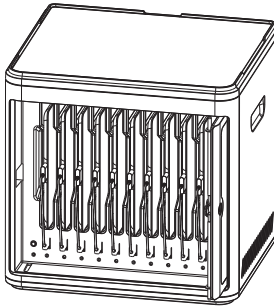

ELECTRIC SHOCK
Operate Carefully

- . Always turn OFF the power to the product before plugging IN or OUT.
- . Do not unplug the power cord from the outlet when your hands are wet.
- . Do not use cables that are damaged.
- . Do not unplug by pulling on the cable.
- . Do not plug the cable into an extension cable.
- . Keep the door closed and locked when in use.

- . This product is not designed to be operated by a child or student. Only adult operation and supervision should move this product.
- . Do not allow anyone to sit, stand or climb on the product.
- . Move the product with caution.
