For Mays Ali

Hi Alogic team,

My name is Mays, and I am writing to you to express my interest in your role as an industrial designer. I am a qualified and experienced Industrial designer from New Zealand and am looking to move on to a more challenging and exciting role. I am ready to relocate myself and I do not require a visa or sponsorship.

I obtained my degree in industrial design from Victoria University in Wellington in 2015, an experience that has expanded my abilities and skills, preparing me for roles that require innovation and fresh perspective.

My most recent role has been a designer for Great Little Trading in London, which is an award-winning children's online retailer predominately selling toys, furniture, home accessories and textiles in the UK. For all of the mentioned products above, I was to create concepts and develop them into realized, marketable products. On a daily basis I would create models and renders on fusion 360, concept, artwork and presentation visuals on adobe programs, construct product mock ups and then draw up accurate technical drawings ready to be sent to manufacturers.

Prior to this role I have worked as a graphic designer in the, a kitchen designer and freelance graphic designer. All of these roles lend a skill that I believe is valuable to this role, such as the ability to work independently but also work as productively with others in a team. Working so much with clients has given me the confidence to clearly present and communicate ideas with others, and furthermore it has made me learn to stay organized and maintain good time management even under high-pressure situations.

Finally, as a designer, I am naturally interested in technology and am keen to learn more about designing technological products. Anything that stimulates my interest always gets me curious and pushes me to find solutions.

Thank you for your kind consideration of my application,  
Mays
