

## Cover Letter

CG artist / Mid - Senior level

I am a CG artist with a high level of experience in multiple roles, seeking a fulltime position at your company.

I have a Multimedia Developer degree and 20+ years of experience in the field of CG. I started out in game development as a 3d asset artist and texture painter which i did for almost 8 years at various companies in Europe. I left game development to pursue an interest in architectural visualization and product visualization / TV post production.

I worked on various TV commercials doing product replacement, VFX and CG generalist tasks, modeling shading in Max, Vray, Corona, Nuke, After Effects, tracking in Pftrack etc. I have worked on TV ads for Pepsi, Cadbury, Galaxy Chocolates, Chevrolet, Telecom and Media companies.

At this time I transitioned to architectural visualization, environment design, product renders. I have spent the last 14 years in this field working on projects in Dubai and recently being a freelancer and working on residential and commercial projects in architectural visualization and also working with Lowe`s US and others doing product renders for brochures and online media.

I believe my technical skills and my experience would be a great fit for your company. I am eager to put out detailed and exceptional work due to my daily dealings with clients and designers, understanding the brief, quoting and even managing my team of artists now and then. I have taught 3d to beginners and have managed projects and teams for architectural projects.

Im easy going, friendly and have advanced English skills due to growing up in the UK and Canada.

Please find my resume for additional information regarding my personal life and skills. Within the resume you will find links to my most recent online portfolio and works but if there is anything other you require, please feel free to ask me.

Sincerely

Peter Mayer

3D artist / CG supervisor
