While pursuing my master's in business information systems from Monash University, I learnt a lot about Business analysis and Data analysis. With an In-depth knowledge in SAP ECC6, SAP Hana, Business process, Enterprise systems, Enterprise Architecture and Data Visualisation I think I would be a perfect fit for this role. I worked part-time as a Receptionist at Monash Postgraduate Association(MPA) where I closely interacted with students and helped with various academic and non-academic related issues.

I completed my studies in Banking services immediately after completing my Bachelor's degree in computer applications. I worked full-time as an Assistant Manager for Axis Bank Ltd. India's top private bank. The role has given me a lot of exposure into both the financial and IT aspect of the Bank which has helped me bridge the gap between both the sectors. The role has also given me a range of practical and theoretical capabilities.

This position has given me key employability skills while also allowing me to experience working in a professional and fast-paced work environment.

My motivations include learning new things and the challenge of meeting key objectives.

I would appreciate the opportunity to meet with you to discuss my application at an interview. I have enclosed a copy of my resume for your consideration. I can be contacted at all times on the details provided above.

Thanking you in advance for your time,

Aarabhi
